Executive Summary Snapshot :- Nowadays people are facing problem to find medicines specific medicines at medical stores so they have to check out 2-3 medical stores to find the medicines or at night in emergency people can't find medical store which are open.

Project Description :- To solve the problem that people are facing. So I will develop a app to solve that problem. In this app I will list all the medical shop owners and all the medicines that are available in the medical stores with their opening and closing time & also their location of the medical stores. This app will prioritize the medical stores which are open 24/7 & the stores which are nearby any hospital & also the medical stores which are nearby the user's location.

Project Scope :- The purpose of this app is to ~~People~~ user's time & help people in emergency. this app provides location service, opening and closing time, stores which are open 24/7 & ~~near~~ the stores which are near the hospital. with user friendly interface.
